Dear █████ , Cc █

See email below re SASE conference and call for 4dw / WTR abstracts,
I thought that you might be interested in contributing? And please pass this on to anyone else in Spain or South Cambs or beyond with an interest in working time reduction,

Kind Regards,

████████

Hello all,

████████████████████) at University of Cambridge has been taking the lead in establishing a new network for working time reduction researchers, along with other founding members such as myself and ██████████ .

The network will be launched in the form of a 'mini-conference', to be held at the larger SASE conference in Limerick, Ireland, 27-29 June 2024.

If you were interested in submitting a paper for consideration, it would be wonderful to see you there! Part of the rationale for starting the network was to have more regular contact with people whose work we draw on and admire. If you choose to submit something, you would need to select **MC01: Working Time Reduction: Towards a more balanced, just and sustainable economic life.**

https://sase.org/event/2024-limerick/#submissions

Some members of the network are working on finding funding for attendees who need it (although no news on this just yet), plus if you are unable to come this time, there will be other opportunities to do network-related things in future. A proper introduction and invitation to join the network will follow from ████████████ in due course.

Hope to see you, and please also feel free to forward the invitation on to friends, colleagues and

students working in this area.

All the best,

█████
